Anti-slavery Policy

Purpose

Mulberry Waste are committed to understanding and mitigating the risks associated with modern slavery in our business and those in our supply chain.

We routinely review our policies, risk assessments, due diligence and training associated with modern slavery, and we continually work with our suppliers to ensure compliance to the Modern Slavery Act 2015.

Our Suppliers

We are working closely with our supply chain to ensure that indirect suppliers are acting ethically and have effective controls and procedures to ensure that slavery and human trafficking is not taking place.

We have undertaken a group wide risk assessment to highlight areas of vulnerability and where applicable, we will strengthen our processes in any areas highlighted.

Any examples of non-compliance will be reviewed, and appropriate action will be taken.

Mulberry Waste will endeavour to.

1. Meet all employment law requirements.
2. Use suppliers with recognised industry accreditation.
3. Build and develop long standing relationships with suppliers.
4. Use national or international supply chains, our point of contact is always with a UK company, and we expect these entities to have sustainable anti-slavery and human trafficking policies & processes.
5. Audit companies where appropriate.
6. Report any suspect activity to the relevant authorities.

The board of directors will review and assess compliance to the Modern Slavery Act 2015 at least annually.
